

**Protection during CT examinations**

Reduction of radiation exposure for:

- **Thyroid gland by approx. 65 %**
- **Sternum by approx. 80 %**
- **Chest and shoulder joints by approx. 90 %**

**Model:** RP648 Patient protection for CT scans, e.g. of the skull  
Shield for thyroid, sternum, chest, and shoulder joints

Made in Germany

**RP648 – Patient Protection for CT Scans**

**RP648 – The Smart, Reusable Patient Protection for CT Scans**

Patient guards for CT examinations from MAVIG provide the ideal X-ray protection. The patient can put the guards on quickly and they remain securely in the desired position.

Optimally implemented in the RP648 patient CT drape: the patient guard is easy to use and position without any further aids or closure systems. An additional thyroid protector can be folded into position if required.

- **Protective Material** Standard lead
- **Lead Equivalent** 0.35 mmPb
- **Outer Material / Colours** ComforTex® HPMF, ComforTex® HPMF Plus (designs only), available in the colours:  
*Titan, Blue Admiral, Regatta, Curacao, Lagoon, Mandarin, Orchidee, Baccara, or designs: Happy, Nautilus*
