MAVIG Track Columns with Carriage – 360° and Twin

Solid construction for maximum safety. Many years of development has led to MAVIG’s unique steel columns. The proven construction, sturdy design, and numerous tests ensure the highest level of safety available.

The patented brake mechanism is a standard for all support systems with a carriage. The brake holds the carriage at a fixed position inside the ceiling track, which provides additional safety during its use.

MAVIG columns are equipped standard with one electrical pin for a direct connection to a lamp.

- Each pin offers a 235° rotation (360° for the lower pin of the 360° column)
- One electrical connection: One 3-pole sliding contact
- Net load at spring arm adapter: Max. 18.0 kg (39.7 lbs) per pin (depending on length)
- Different lengths to match room height
