

Levio® Edition - 2 Measurements

With the help of this template and a standard measuring tape, you can easily determine your body measurements. Based on the measurements an optimised Levio Edition apron will be made or, if needed, your MAVIG clothing size is determined. Before you use the measuring tape, please note the following:

The requested measurements should be body measurements, measured **without any additions** but also without being constricting. Correct values cannot be determined if you measure yourself. The measurements must always be taken by another person. The person being measured should stand straight with arms hanging to the sides.

Please fill in the following points.

● **Measurements for:** _____
(First name and surname)

Woman **Man**

① _____ **cm Position from above (Levio®)**

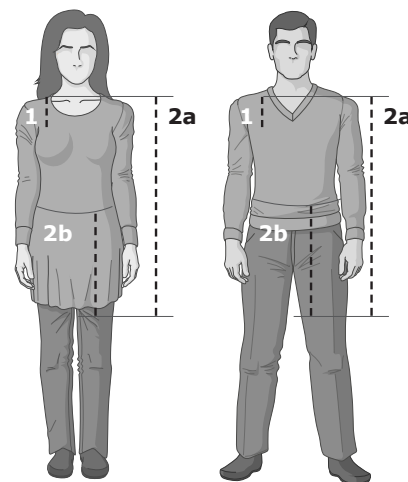

Measure from the middle of the shoulder the start of the breast
(about at the second rib, between the collarbone and the mammary papilla)
